

Change the Windows 11 Lock Time

Wolf Creek step-by-step guide

Before you begin: Your Wolf Creek computer may enforce security settings that limit which options you can change.

STEP 1 Open Lock screen settings

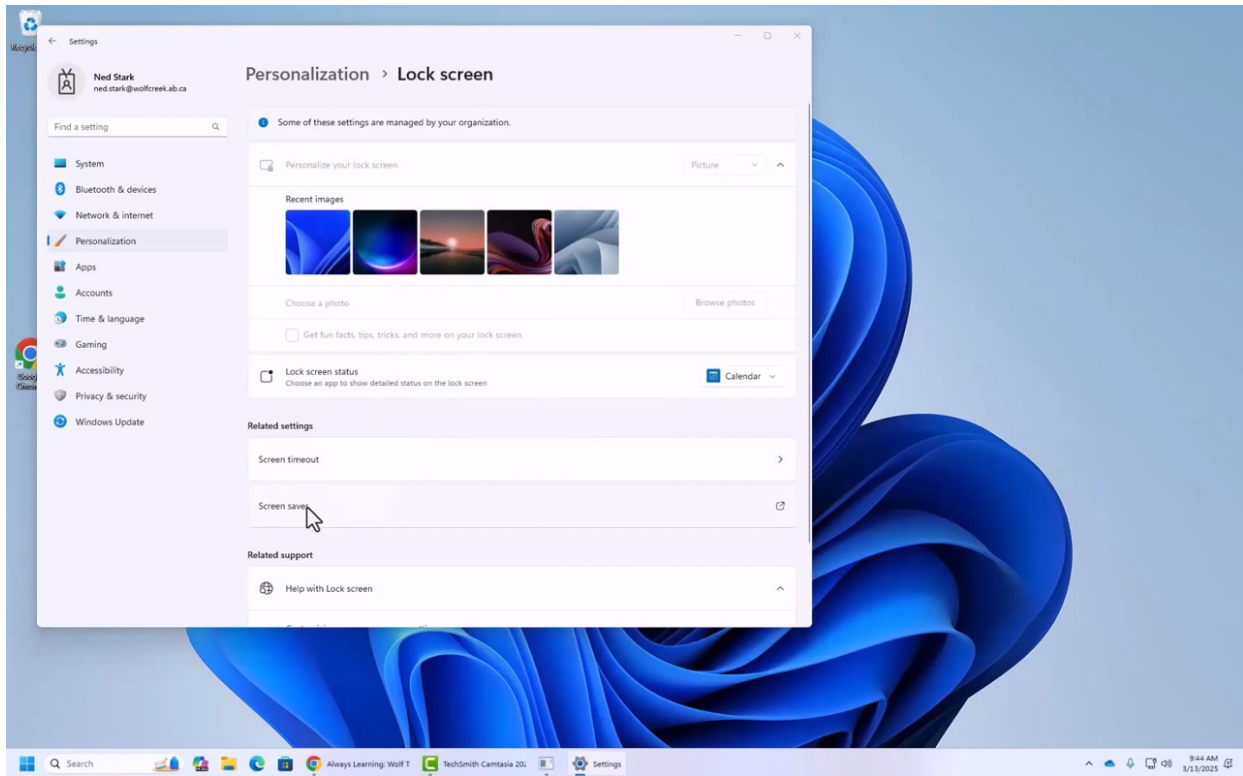

Open Settings, select Personalization, and then select Lock screen.

Open Lock screen settings.

STEP 2 Open Screen saver settings

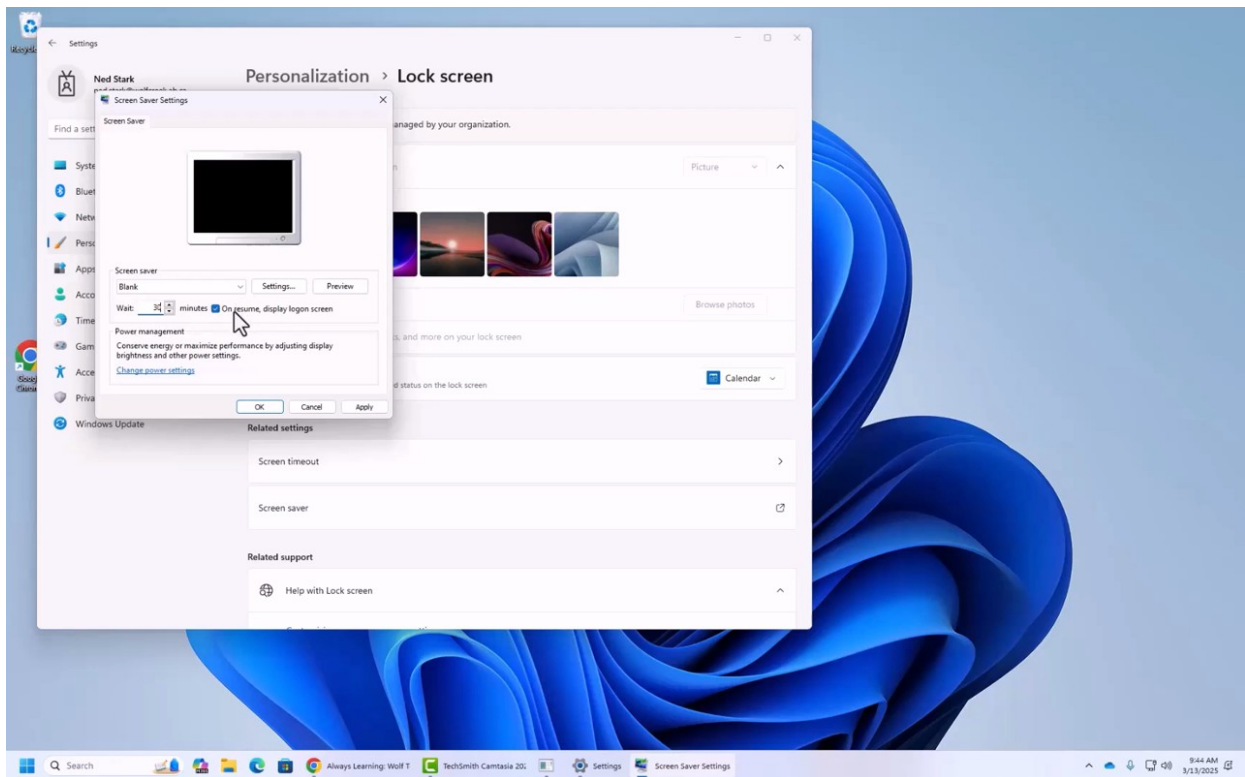

In Related settings, select Screen saver.

Open Screen saver settings.

STEP 3 Set the wait time

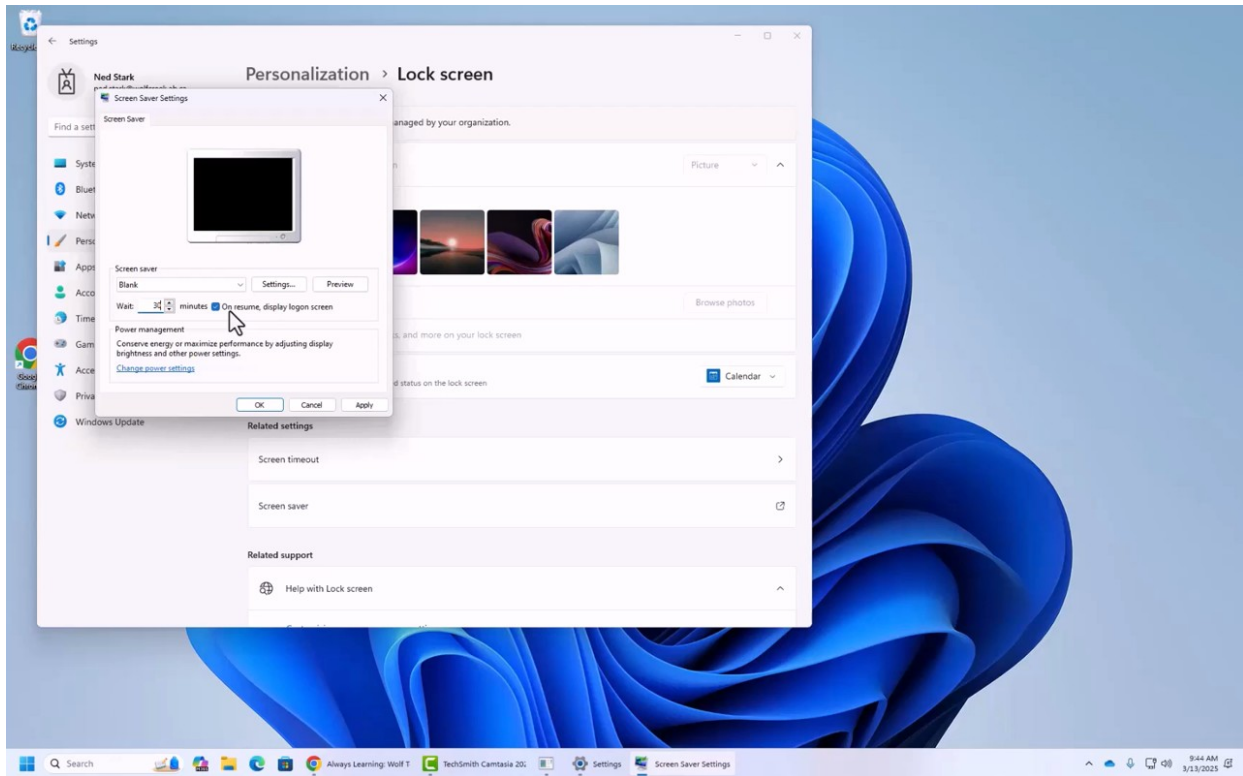

Choose the number of minutes Windows should wait before locking or starting the screen saver.

Set the wait time.

STEP 4 Require sign-in and save

Select On resume, display logon screen, then choose Apply and OK.

Require sign-in and save.
