

Open an Incognito Window in Chrome

Google Chrome step-by-step guide

Before you begin: Chrome menus can move after an update. If a label looks different, use the search box at the top of Chrome Settings to find the named setting.

STEP 1 Open the Chrome menu

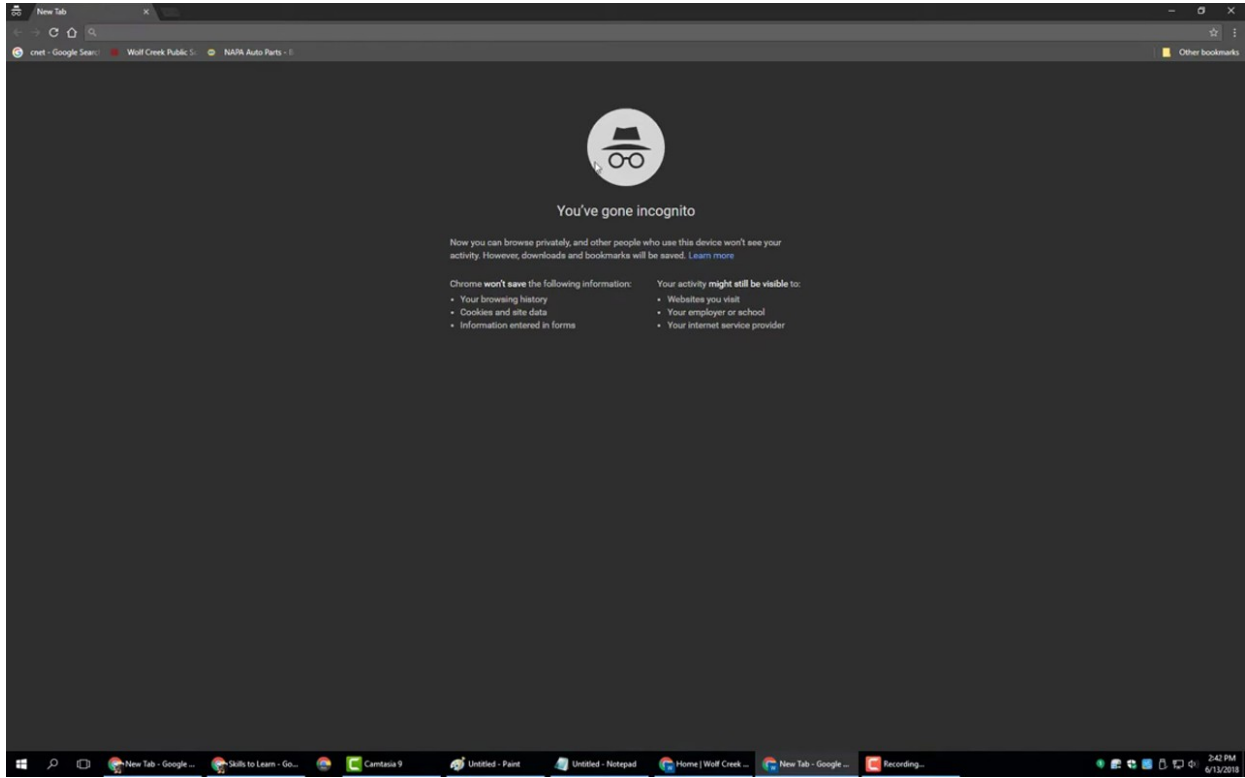

Select the three-dot menu in the upper-right corner of Chrome.

Open the Chrome menu.

STEP 2 Select New Incognito window

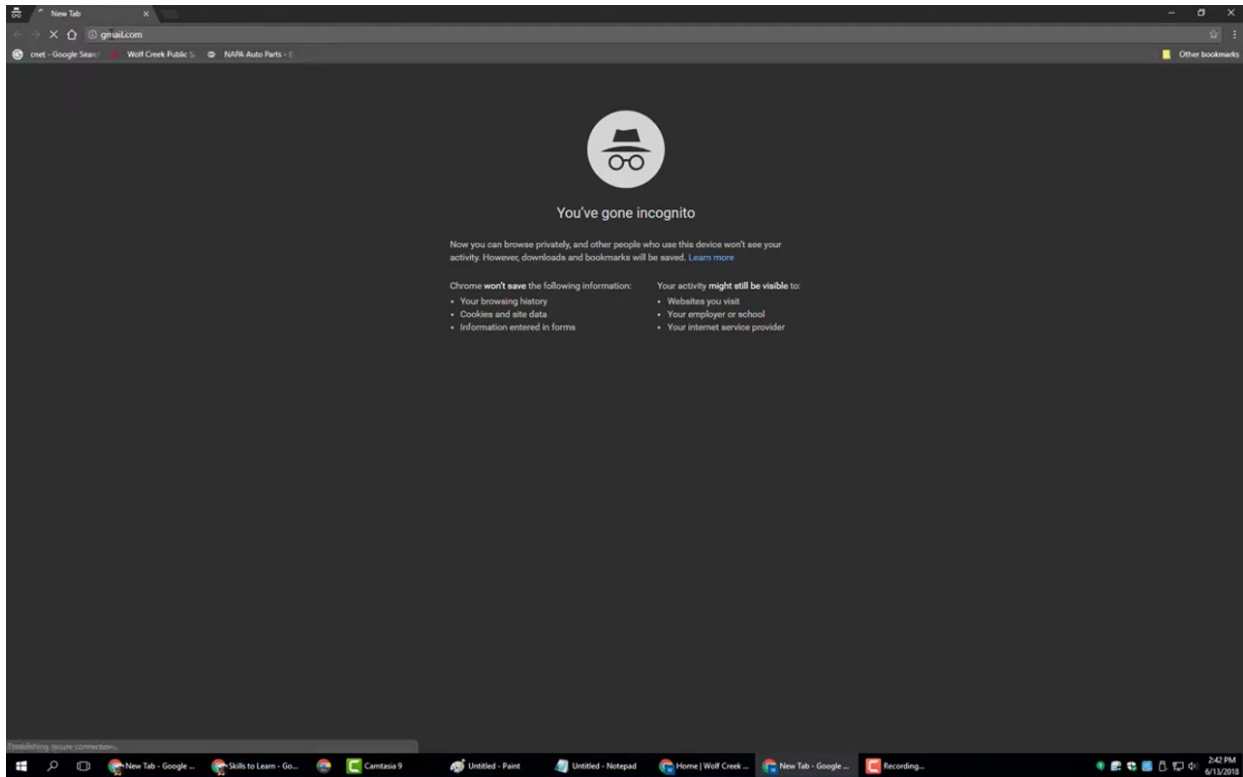

Select New Incognito window. You can also press Ctrl + Shift + N on Windows.

Select New Incognito window.

STEP 3 Confirm Incognito mode

A dark Incognito window opens. Browsing in this window is separate from your regular Chrome session.

Confirm Incognito mode.

Finished

Your Chrome setting is ready. If the option is controlled by Wolf Creek, submit a Freshdesk request for help.
