

Use the Windows 11 Start Menu

Wolf Creek step-by-step guide

Before you begin: The Start menu gives you access to applications, account options, search, and power controls.

STEP 1 Open the Start menu

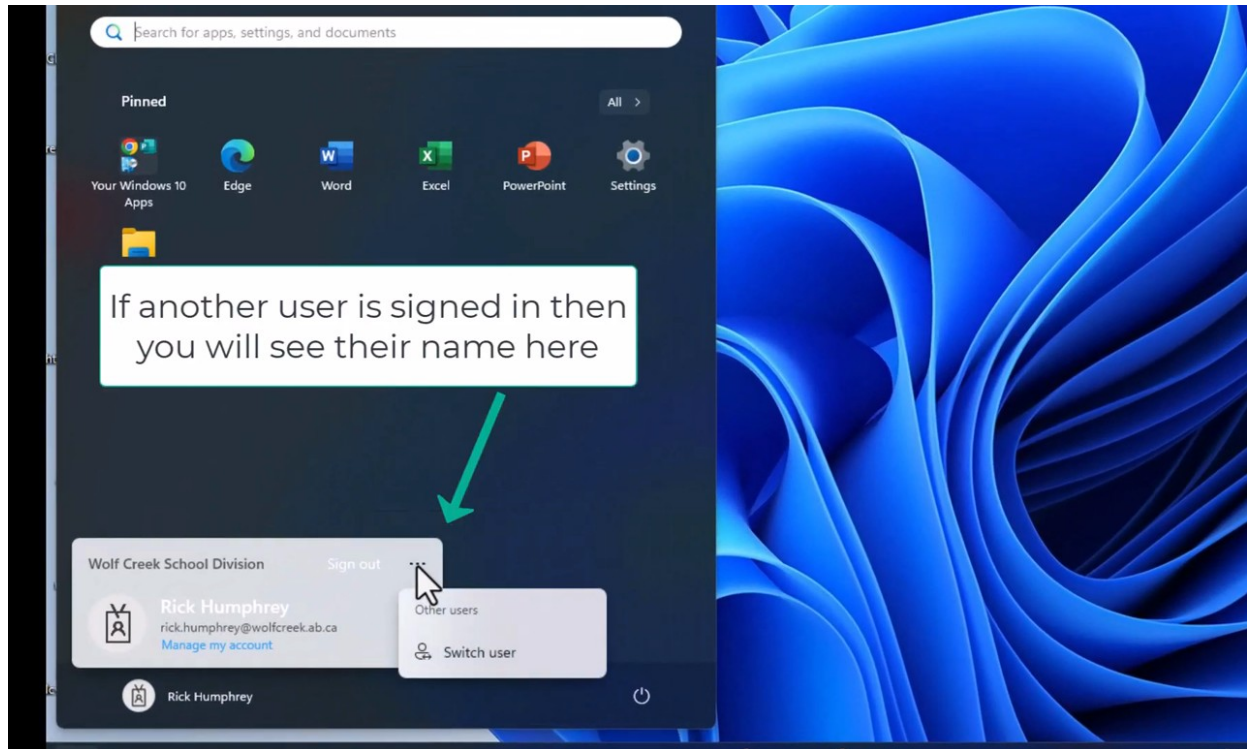

Select Start on the taskbar or press the Windows key.

Open the Start menu.

STEP 2 Use account options

Select your name to view account options, switch users, or sign out.

Use account options.

STEP 3 Use the power menu

Select Power to lock, sleep, shut down, or restart the computer. You can also press Windows key + L to lock it quickly.

Use the power menu.

STEP 4 Find an application

Select All apps or use the search box to find and open the program you need.

Find an application.
